HOME DEMONSTRATION NOTES

To work in the most efficient manner, it is necessary to have good equipment. In buying new equipment, housekeepers should study the utensil to be bought to see if it is suited to her needs and her size family, if it is so constructed that it will save her more time than she will spend in washing the utensil, whether the shape, the material and finish are the most satisfactory that can be bought, and whether that particular tool will pay her in use for the money spent. Some of the labor-saving devices which should be studied by housekeepers are the vacuum sweepers, the oil mops, bread-mixers, dish-drainers and the small gasoline engines to run the separator, churn, washing machine, etc. Among the step-savers, the kitchen cabinet should be considered. A cold box, built outside a kitchen window, saves many trips to the cellar in cold weather. Built-in wood boxes that can be filled from the outside will save steps and dirt in the kitchen. Inexpensive light trays, as well as wheel trays should be more generally used for serving foods and carrying out soiled dishes. Putting the kitchen table on castors so it can be easily moved to the part of the kitchen where needed is a great help. If the housekeepers could just form the habit of sitting on a stool of the right height when preparing foods, they could save a vast amount of energy. The fireless cooker should have a place in most kitchens. It will save fuel, keep the heat out of the kitchen in the summer, and will at all times save steps and time used to watch foods, baked or cooked on the stove.

TEST YOUR CATTLE

Anyone wishing to have his cattle tested, free, for tuberculosis can do so, if he will follow these instructions:

1. Make application to Dr. W. C. Dillard, Farmington, or to the County Agent.
2. Agree to co-operate with the Bureau of Animal Industry and the Veterinary Department of the Missouri State Board of Agriculture.
3. Agree to have the whole herd tested (without expense).
4. Agree to remove and dispose of all animals that react.
5. Agree to allow no untested herd to associate with the tested herd.
6. Agree to subject premises contaminated by tuberculosis-affected animals, as indicated by a physical examination, or a tuberculin test, to a thorough cleaning and disinfection, at owner's expense, under the direction or supervision of the Bureau or State officials.

This application for tuberculin test should be sent in immediately to Dr. Dixon, representing the state, and Dr. Rohrer of the Federal Government will be in the county in January to do this work. Full particulars can be secured from Dr. W. C. Dillard or from the County Agent.

WHAT TO DO NEXT YEAR

1. Plan to grow practically all food and feed needed on the farm.
2. We should keep at least enough good livestock to consume the roughage that usually goes to waste, to provide a full year's work for men and horses, to furnish milk and butter, to provide pork and pork products, and to supply poultry and poultry products for home use.

3. We should keep at least one brood mare on the farm to do the light work and to raise the necessary colts to furnish horse power. This will save the money paid out for mules and horses, but the greatest profit will come from securing in this way sufficient horse power for the most economical production of crops.

4. Only the most prolific seed of all kinds should be planted.

5. A systematic rotation of crops should be practiced and a leguminous crop should be grown on every acre of land every year.

6. Liberal applications of acid phosphate should be made on all soils deficient in phosphorus, and lime should be applied to soils needing lime.

7. Labor-saving farm implements and machinery of all kinds should be used for the most economical production of crops.—The Progressive Farmer.

A SPLENDID CHRISTMAS GIFT

J. L. Blunt, L. W. Garrett and J. W. Highley, all of Desloge, were busy the first of the week soliciting the business houses of the lead belt for food and supplies for the Presbyterian Orphanage at Farmington. We understand the gentlemen had splendid success and the total contributions will amount to something like \$2500. One certainly could not contribute to a more worthy or needy cause than to the Orphanage and the gentlemen who were so generous with their time in the soliciting are certainly deserving of much praise.—Desloge Sun.
